

# Jean Pascal Kourouma

*Full Stack Web Developer*

## CAREER OBJECTIVES

---

I am a Computer Science student with a penchant for design, creativity, art, and storytelling. I am passionate about enhancing user experience and maximizing user interface.

My professional goal as a Freelance Full Stack Web Developer is to continue creating innovative and functional web solutions for a variety of clients. I aim to broaden my skills by staying at the cutting edge of emerging technologies, while deepening my understanding of web development best practices.

In the long term, I'm striving to evolve towards more complex projects and take on greater responsibility in web project management. My ambition is to become a recognized web development professional, capable of meeting technological challenges while maintaining an ongoing commitment to quality and customer satisfaction.

## SPECIALIZATIONS

---

- Web Design
- Front-end coding
- Back-end coding
- Custom databases
- User Interface/User Experience
- Design Thinking
